## Main Reassessment Concepts

1. Identify people who are due to be reassessed
2. Reassess them (both interview and H indicators)
3. Enter data in SPARS

integration.samhsa.gov

## Best Practices – identify people who are due for reassessment

- Use SPARS or your own document. No one correct method as long as your information is accurate
- Start calling them as soon as the reassessment window opens. You have 60 days, don't wait until the last minute!
- Do you schedule the interview or engage with the individual when they're onsite?

integration.samhsa.gov

## Best Practices – getting the interview and H indicators

- Make sure you have enough people trained to do NOMs interviews
- You can offer incentives
- Schedule bloodwork if necessary

integration.samhsa.gov

## Best Practices – entering the data into SPARS

- You have 30 days to enter a complete NOMs interview into SPARS
- Make sure you have a process for adding H indicators to SPARS if the information is not available when the interview is complete

integration.samhsa.gov

## Additional Best Practices

- Check your reassessment rate often
- Check missing H indicator report often
- Draw out a workflow of your reassessment process  
Aids in consistency and tinkering with your process

## Group Conversation

What clever or innovative practices have you used to collect information at baseline and reassessment?

## Discussion Questions

How did you collect the data?

- Did you collect anything besides PBHCI?
- Clever collection techniques?

How did you prepare the data?

- Did you use special software? In your EHR? Did you hire someone?

What did you prepare?

- What information are you sharing? Health outcomes? Cost savings?

Who did you share it with?

- The state? Managed care? ACO? Grant applications? Newspaper?

integration.samhsa.gov

**Optional Team Activity** (depending on time)

- Make a plan for improving reassessments
- Make a plan for sharing data with external stakeholders
